A Complete ETF Solution Set for Every Strategy

Every investor is different, with unique goals shaped by their circumstances and life stage. At Horizon, our innovative goals-based investing framework provides solutions designed to meet people's evolving needs and objectives, ensuring portfolios stay aligned with what matters most.

We provide financial advisors with flexible, outcome-oriented investment strategies to match investors' individual goals—whether they seek wealth accumulation, asset preservation, or retirement income. Our suite of actively managed ETFs leverages options overlays and tactical positioning, equipping advisors with tools to meet a variety of client needs.

Each of Horizon's ETFs is structured for one of three stages of a financial journey: Accumulation, Preservation, and Distribution. The Accumulation stage focuses on growing an investor's wealth over time with a portfolio that reflects their appetite for risk. The Preservation stage emphasizes protecting an investor's portfolio from drawdowns that could derail their financial plan. The Distribution stage prioritizes ensuring that an investor's portfolios can generate distributions over many years.

At Horizon, it's about more than just a single investment product. Our ETF platform is designed to integrate seamlessly into advisors' existing models and investment philosophies, serving as a natural extension of their approach rather than a standalone solution.

Each ETF uses a specific strategy for its asset class, spanning non-traditional fixed income, quantitative and multi-factor models, global allocation, and options-based risk mitigation. This gives advisors a complete, adaptable investment toolkit that addresses an investor's unique risk, return, and liquidity needs.

For instance, the Horizon Nasdaq-100 Defined Risk ETF (QGRD) provides exposure to the Nasdaq-100 while actively managing downside risk through options strategies - making it an appropriate option for investors who want to remain invested in growth markets without compromising progress toward long-term goals. The Horizon Digital Frontier ETF (YNOT) provides intelligent exposure to Artificial Intelligence (AI) and the broader digital frontier. Rather than offering a static AI allocation, YNOT is designed to adapt as innovation evolves, allocating across the AI ecosystem and adjacent technologies market leadership changes. This approach allows advisors to incorporate forward-looking growth in a more diversified manner while balancing opportunity and risk.

Our ETFs offer a differentiated approach rooted in Horizon's longstanding commitment to goals-based investing, as each fund is intentionally designed to align with key stages of a client's financial journey: growing wealth, protecting assets, or preparing for retirement. This structure empowers financial advisors to build portfolios aligned with client outcomes and use tools to create more personalized, purpose-driven investment experiences.

Important Disclosures

Investors should consider the investment objectives, risks, charges, and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the fund, please visit horizonetfs.com or call (866) 371-2399. Please read the prospectus carefully before investing.

Investing involves risk, including potential loss of principal. There is no assurance that the Fund will meet its objective. The ability of the Fund to meet its investment objective is directly related to the allocation of the Fund's assets. Horizon may allocate the Fund's investments so as to under-emphasize or over-emphasize investments at the wrong times or under the wrong market conditions, in which case the Fund's value may be adversely affected. The market price of equity securities owned by the Fund may go down, sometimes rapidly or unpredictably. Equity securities may decline in value due to factors affecting equity securities markets generally, particular industries represented by those markets, or factors directly related to a specific company, such as decisions made by its management.

Investments in options involve risks different from, or possibly greater than, the risks associated with investing directly in securities, including leverage risk, tracking risk and, in the case of over the counter options, counterparty default risk. Option positions may expire worthless exposing the Fund to potentially significant losses

Nasdaq-100 is a stock market index made up of equity securities issued by 100 of the largest non-financial companies listed on the Nasdaq stock exchange.

Nasdaq®, Nasdaq-100®, and Nasdaq-100 Index®, are trademarks of Nasdaq, Inc. (which with its affiliates is referred to as the "Corporations") and are licensed for use by the Adviser. The Fund has not been passed on by the Corporations as to its legality or suitability. The Fund is not issued, endorsed, sold, or promoted by the Corporations. THE CORPORATIONS MAKE NO WARRANTIES AND BEAR NO LIABILITY WITH RESPECT TO THE FUND.

Diversification cannot assure a profit or protect against loss in a declining market.

Shares of any ETF are bought and sold at market price (not NAV) and are not individually redeemed from the Fund.

Brokerage commissions will reduce returns.

Horizon ETFs are distributed by Quasar Distributors, LLC.
